Town Council Keep Within Estimates For The Current Year

Routine Business Transacted at
Regular Monthly Session

That the various committees of the Bassano town council had kept well within their estimates for the current year was shown in a report by secretary treasurer J. B. Donaldson read at the council meeting last Monday evening, December 2. The report showed that up to Nov. 20, except for one or two minor items the committees had not spent more than the amount allowed them in the 1935 budget.

Town Engineer Frank Mead turned in his report for November, showing some improvement work done at the cemetery, and considerable repair work to the water supply system.

A new regulation was put into effect whereby persons applying for permits to move buildings must have the grounds inspected by a town engineer to see that trees will not be damaged in the moving.

Accounts

The following accounts were read and passed for payment:

Mother's Alliance	\$ 325.40
Flanagan Bros.	14.95
Telephone	17.00
Power Co.	34.00
Workers' Comp. Board	11.10
Kings' Printer	4.00
Wm. Honey	10.00
J. Alexander	16.00
W. S. Playfair	29.22
Pay Roll for November	676.25
A. R. Maurer	20.00

Makepeace News

MAKEPEACE, Dec. 4—Another of the series of house parties was held at the C. C. Jorgensen home on Wednesday night. A large number of friends attended, the evening was spent in cards and dancing.

An American Thanksgiving dinner at Herbyford was very much enjoyed by a number of friends on Thursday evening last week.

C. Jorgensen and T. Mullen, were Makepeace on Friday last week making a few alterations around the school.

Mr. and Mrs. F. Parley, of Hussar, were visitors here last Friday.

The Gleichen dance on Friday will long be remembered by its good time, and the rain and mud on the way home.

Mr. and Mrs. P. Holman motored to Bassano Saturday evening.

Mr. and Mrs. H. Campbell were visitors at E. W. Campbell's on Sunday.

Don't forget to book your evening right this season, and keep Monday 23rd for the event of the year. It is the night of the Makepeace school concert and dance.

Harvey Jorgensen took some friends for a motor trip on Sunday going to Arrowwood, and bringing home his sister for the holiday.

JUVENILE HOCKEY CLUB DANCE

The Bassano Juvenile Hockey Club will hold a dance Friday of next week, December 13. Jack's Gaiety Gang will play the music.

Gem News

GEM, Dec. 4—The dance held in the Gem school last Friday night under the auspices of the Gem Junior Red Cross was very well attended, and was a very enjoyable affair. Excellent music was supplied by the dancers. The orchestra was in charge of Sam Lawrie, assisted by W. Pollock and J. McLeod. The Misses G. Portney and M. McLeod also played for dancing during the evening. An excellent supper was served by the juniors about 11:30 a.m., and dancing was resumed at 12:30. The young Red Cross juniors are to be congratulated on the success of this, their first venture in social work, particularly as the proceeds are to be devoted to the Red Cross Hospital for crippled children in Calgary.

John Douglas accompanied his daughter to Bassano on Saturday last.

Mim H. Watkinson, who has been receiving medical treatment in the Bassano Hospital during the past few weeks, is reported to be improving.

Mrs. Archibald and son arrived home recently from the Bassano Hospital.

Several children who have been suffering from a slight attack of tonsillitis and mumps are reported to be now recovered.

Mrs. A. P. Miller was a business visitor to Bassano on Saturday last. During her absence Mrs. B. Selridge was in charge of central telephone.

Rev. J. V. Smith was in the Colony Friday afternoon.

E. A. Beck was a Friday visitor in the Colony.

M. Atkins and C. Douglas, were week-end business visitors to Calgary.

The members of the Gem Junior Red Cross wish to thank their many friends for their generous donations of refreshments for the supper, and also to thank most sincerely each member of the orchestra who so generously gave their services free, and all who in any way helped to make this Junior Red Cross dance a success.

On Saturday afternoon Miss G. Portney and brother Don were callers on the Maglans, Melwoods, and Gregors, collecting a skating party.

The home of F. Williamson is being remodelled. A water system is being installed, including a bathroom. Hardwood floors are being laid in two of the rooms.

A class of thirty grown-up members of the community is attending the evening classes held on Tuesday and Thursday in the Gem consolidated school, with Principal L. O. Berger in charge.

Perogers are to be shipped through the pool are to be in Bassano early Monday, Dec. 9, where they will be graded and packed by representatives of the Gem school.

Practises and rehearsals for the 1935 concert and Christmas tree are to commence this week in the Gem school.

Mr. and Mrs. James were Saturday visitors at Maglans.

Owing to the severity of the weather at the week-end the Gem picture show outfit was not taken to Hinton as previously arranged.

Card party in the Gem school on Friday evening. Proceeds in aid of the Red Cross fund.

Women's Institute Elect Officers For The Year 1935

Organization Prepares for Active Year in 1935

The Bassano Women's Institute held the annual meeting in the Odd Fellows' Hall last Tuesday afternoon, December 3. The following officers were elected to serve the 1935 term:

Pres., Mrs. Corbett
1st Vice Pres., Mrs. M. P. Maurer
2nd Vice Pres., Mrs. J. Dayford
Sec. Treas., Mrs. M. E. Granlund
Executive, Mrs. P. Graydon, Mrs. H. S. Johnson, Mrs. Clark, Mrs. H. A. Holmes, Mrs. H. Bacon, Auditors, Mrs. A. P. Duffin and Mrs. H. A. Holmes.

The delegates, who are always elected at the annual meeting, were chosen. Mrs. Corbett was elected delegate to the convention in Calgary. Mrs. H. A. Holmes to Lethbridge and Mrs. M. E. Granlund to Hinton.

The attendance at the annual meeting was not very large, but the officers of the organization expect an active year in 1935.

The next regular meeting will be held Tuesday, January 7.

FORMER BASSANO YOUNGSTERS IS CLEVER MUSICIAN

Friends of Mr. and Mrs. T. O. Stewart, formerly of Bassano, but now of Toronto, will be pleased to hear of the success in music with which their eight year old daughter, Dorothy, is meeting. Since leaving her native city, three years ago Dorothy has passed three examinations, having had the distinction of being the youngest to take examinations in 1935, at the same time taking three highest marks in the entire conservatory where she is studying.

Dorothy is studying piano, violin, and singing. She is a very clever child, and her parents are proud of her achievements.

Duchess News

DUCHESSE, Dec. 5—Mrs. Sam Howe is visiting her daughter Lillian in Calgary.

The supper held in the church basement by the Ladies Aid Wednesday evening was patronized by a large number, and was a financial success.

Mrs. Wieg and son Arthur left for Long Island, New York, to spend the winter.

Mr. and Mrs. Ross McDonald, Jean and Lyle, left last week for Manhattan, Kansas.

Miss Marie Plev, of Calgary, is here visiting her folks.

Mr. and Mrs. Roy Peterson expect to arrive soon for Nebraska to spend Christmas.

Miss Hyndman, of B. C., is assistant postmistress.

At the whist drive held in Liberty Hall last night Mr. Miller won the lady's first prize, and Mrs. Roy Ferguson second.

Wednesday was a busy day in Duchesse. The U. F. A. held a turkey shoot, and Mr. Halley put on a boxing program.

BASSANO WOMEN DRESSED IN CHRISTMAS ATTIRE

With Christmas only a few weeks away the Bassano merchants are dressing up their windows, show cases, and shelves in Yuletide trimmings.

New Christmas goods may be seen on display, and the merchants are exhibiting a choice selection of articles for the gift giving season. Wise shoppers are already planning their Christmas lists, and from the great variety of gift suggestions on display this should not be a difficult problem.

Wheat Crown Comes Back To Alberta

J. H. B. Smith, of Wolf Creek, Wins
Conquest Honors

The wheat king crown was brought back to Alberta on the brow of J. H. B. Smith, a farmer of the Wolf Creek district. Wolf Creek is on the C. N. west of Edmonton. The Alberta man won the championship at the Chicago Hay and Grain Show this week. The winning grain was a sample of hard red spring wheat, weighing 62.5 bushels to the bushel.

Smith's victory brings the championship back to Alberta after an absence of two years. The last time the crown was won by a Canadian was C. E. E. Smith, a Montana farmer, who captured it from Herman Treble, of Preston, Brier, 1932 champion. C. E. E. Smith was a strong competitor this year, his wheat running a close second to the exhibit of J. H. B. Smith. The wheat championship at the Chicago show developed into an all Smith affair, with the Alberta man winning out in the final judging by a superior lustre and uniformity of grain.

Dirty Chimneys Cause Fire Threat Thursday

The strong northwest wind on Thursday afternoon this week was the cause of two chimney fires. Both were extinguished before causing any damage. The first occurred between five and six o'clock in the afternoon, the second at six o'clock.

At the home of Mrs. R. S. Wight, Sparks from the burning chimneys were blown about in a dangerous manner, but the flames were soon quenched with chemical extinguishers.

Fire Chief Tom Ingber points to these two fires as an example of the great fire risk of dirty chimneys, and emphasizes the need of seeing that chimneys are cleaned.

News Budget From Hussar

HUSSAR, Dec. 4—Mr. and Mrs. J. E. King motored to Calgary on Wednesday, and left on Friday evening to spend the winter at the coast.

Jack Humphries was promoted recently, and left on Thursday to assume his new duties at Lethbridge. H. C. French arrived from Chagnon on Wednesday to take the place lately held by Mr. Humphries in the Bank of Commerce.

Mr. and Mrs. C. T. Armstrong spent several days in Calgary last week.

Mr. and Mrs. H. D. Brown, both of Hussar, motored to Calgary on Friday to attend "Mother Goose" at the Grand Theatre returned on Saturday.

Miss Brooks, from near Lethbridge, was a guest of Mrs. J. M. Wellers the first of the week.

The Ladies Aid will meet at Mrs. Clifton's, on Thursday, Dec. 12, to make bags for the Christmas candles.

The Young People's Society will have charge of the church services in the school house on Sunday, Dec. 8, in the school house on Sunday, Dec. 8, if it were twenty.

Mr. and Mrs. R. J. Bull, Jason Bell, and Rev. H. E. Gordon motored to Calgary on Friday, returning on Saturday.

Mr. and Mrs. F. C. Parley returned from a motor trip to Calgary on Sunday.

Mr. and Mrs. W. A. Smith, who have been employed on the Huskies for several years, left on Tuesday for Calgary where they will remain for some time before going to Ontario.

The rain on Friday was not very violent. It came down in torrents for a few minutes. On Sunday the clouds near Hussar were quite gray and several cars were in the ditch, turned over or nearly so, when they struck the deep ruts of the new road west of town.

The village council met on Tuesday evening with all residents present.

Mr. Allen was a business visitor in Hussar on Tuesday.

The pupils of the Hussar school are preparing a play to give on Friday, Dec. 20, at the Christmas entertainment.

The members of the Sunday school are preparing for a special program on Sunday, Dec. 22, when they will sing carols. Rev. H. E. Gordon will address the Sunday school that morning.

Mrs. Green, sister of Mrs. Rolan, returned from Fortia via Bassano on Wednesday morning. She probably will remain with Mr. and Mrs. Holliston after Christmas before returning to Birmingham, England.

The dance to commemorate the opening of Shawnee Waters school on Friday evening was a jolly success. There was a large crowd out from Hussar. The music was furnished by Maxville Anderson, Louis Hoeght, and Romeo Brassard.

Mr. and Mrs. T. A. Hawkshaw motored to Calgary on Wednesday. The town will have been dry, and water work at a depth of 80 feet. It will be used for fire protection, and also to furnish water for the heating risk. The district has been allied, and the curling risk will be flooded as soon as there is a cold snap.

Countess News

COUNTRESS, Dec. 5—Mr. and Mrs. Parrott and family have moved to the farm where J. Cyprian formerly resided.

Mrs. Blinn, Charlie, Fred and Earl Taylor, left Saturday evening for their home at Bayview.

Mrs. A. M. Anderson spent a day with Mrs. Held last week.

Royal Burrows has been on the job last week.

Mrs. M. H. Gamble and Mrs. C. A. Stuss entertained a number of the ladies of the neighborhood at a shower given for Miss Rosie Cowan, who is to be married to J. Deane, December 8. Miss Cowan received many beautiful and useful gifts. All the guests spent a most enjoyable afternoon.

Mrs. M. Ferguson had the misfortune to have her car skid, and she was the cause of a small accident which happened on Sunday while on the way to Bassano.

P. Soreman is building an addition to his house.

The men of the community have been busy this week doing some much needed work on the hall.

R. H. Held is doing some carpenter work for J. Deane.

A. Mullik left last week for Bishop, California, where he will be spending the winter with his parents.

Fire Brigade Hold Annual Meeting

Tom Ingber Elected Chief for
Next Year

The whole Bassano Fire Brigade met on Tuesday evening to attend the annual meeting in the Town Hall last Tuesday evening, Dec. 3rd. The following officers were elected for 1935:

Chief, H. O. Bredin
Vice Chief, T. Ingber
Vice Chief, A. P. Pierson
Sec. Treas., J. Wilson

A sum of money not exceeding \$50 was voted for local Bassano work. Preparations were made for the holding of the annual banquet on New Year's Eve. Plans were also drawn up for holding a whist drive and dance on Friday evening, Jan. 31st.

On Friday evening was a jolly success. There was a large crowd out from Hussar. The music was furnished by Maxville Anderson, Louis Hoeght, and Romeo Brassard.

Mr. and Mrs. T. A. Hawkshaw motored to Calgary on Wednesday. The town will have been dry, and water work at a depth of 80 feet. It will be used for fire protection, and also to furnish water for the heating risk. The district has been allied, and the curling risk will be flooded as soon as there is a cold snap.

All Set For The Carling Club Whist Drive And Dance

Rock Hennessey Has Promised to be
Guest of Honor

It's tomorrow night, Friday, Dec. 6—the Carling Club whist drive and dance in the Masonic Community Hall.

Everything is in readiness for this gay social affair, and a large crowd is expected. What will be played the early part of the evening will be suitable prizes for the winners. Immediately after the whist, the dance will be cleared and dancing begins at once. The dance is scheduled to start at 8 o'clock. Supper will be served upstairs while dancing continues the whole evening without interruption.

The music for the frolics will be supplied by a special orchestra. E. Culley, Mrs. Anastasia, P. Sharpe, and Ward Simpson are the musicians.

ALL SET TO GO

I've been waiting quite a spell for this whist drive. And from what the fellows tell I'll be doing in elegance; For they're making preparations, Fine music, and dancing.

And from all the expectations There will be a crowded hall. The dance set for December 6th, That's the feature at the Carling Club. And every little thing is fixed. To throw a party for your delight. So get dressed up in your gay tights. And come along, don't miss this chance.

To step out and have a good time At the curlers' card party and dance.

Two Arabian Knights Provides Many Laughs

"Two Arabian Knights," with William Boyd, Mary Astor, and Louis Williams in a post-war comedy film will be the feature at the Gem Theatre Friday and Saturday this week, Dec. 5 and 6. The picture was taken from Donald McGibney's story in McClure's Magazine.

Telling the adventures of Private W. D. Dingerfield Phelps and Sgt. Peter McFarlane, following their escape from a prison camp in Arabia, "Two Arabian Knights" thumbs its nose at the serious spectacle of war.

One of the principal players was the Arabian "Kaiser" Pigeon, a Lawrence Stallings-Maxwell Anderson stage play, "What Price Glory?" Boyd was the star of "The Volga Boatmen" and "The Great Dictator" for Douglas Fairbanks in "Don Q."

Where the war ends the story of "Two Arabian Knights" begins. It is a scene derived from Omar Khayyam's tales; the title is explained by the fact that the private and sergeant are knighted by an Emir in Arabia for no good reason.

The picture opens the picture is less concerned with a knighthood than with the Emir's daughter, Anis Bin Adham, who is really Mary Astor. The picture employs dozens of avenues of laughter, ranging from the hysterical-arousing sequences of the soldiers' escape through electrified barbed wire, surrounding the prison camp, to the spectacle of Louis Williams in his red fannels.

Other Halston stars in "The Slavonic Paradox." The feature picture coming Monday and Tuesday next week, December 9 and 10. As a carnival ballet girl, and later as a reformer, Miss Halston is seen in a most fascinating role. She dances—the dance of death. She sings—the song of life. Swiftly she weaves the web of destruction, and then—regeneration.

"Wonder of Women" is the title of the headline billed for Wednesday and Thursday next week, Dec. 11 and 12. The story of the man whose marriage stifled his genius. Years of his wife's devotion, family position—he threw aside everything for a famous romance.

A new angle on the triangle—a thrilling picture from Rudyard Kipling's best selling novel. Norma Talmage plays the leading role in "The Great Dictator," the feature picture coming Monday and Tuesday next week, December 9 and 10. As a carnival ballet girl, and later as a reformer, Miss Halston is seen in a most fascinating role. She dances—the dance of death. She sings—the song of life. Swiftly she weaves the web of destruction, and then—regeneration.

Grain Act Being Rewritten

When Completed Meetings Will Be Held To Receive Suggestions

Steady progress was being made in rewriting the Canada Grain Act, Mr. D. H. Macdonald, chairman of the Board of Grain Commissioners, stated at a meeting of the board held in Ottawa, Tuesday, at one of the many points in each of the prairie provinces. Suggestions will be received with the expectation that a bill satisfactory to those most interested can be ready for the opening of the Dominion Parliament. The act is being rewritten by Col. O. M. Biggar, in Ottawa. Some changes were made in the act last session, that it was believed better to have the whole act re-drafted. No radical changes in principle are being inserted in the bill. The House of Commons were very thoroughly into that last spring.

The changes made in the act provide for the grading of the grain. The grades had not had much effect last year because in crop did not get into the market until after there had been no law against it. Mr. Macdonald said: Almost 90 per cent. of the wheat crop was in the grades and 80 per cent. of the ground number one or number two.

RHEUMATIC PAINS

Cannot Be Rubbed Out — the Trouble Must Be Treated

Through the Blood. The pain of rheumatism is something that you cannot rub out. Every time you rub the affected part, you are advised to rub this or that liniment or oil on the affected part, but after a while the pain is still there. This is because the blood is impure. The blood is impure because it is full of toxins. These toxins are the result of the body's metabolism. The blood is impure because it is full of toxins. These toxins are the result of the body's metabolism. The blood is impure because it is full of toxins. These toxins are the result of the body's metabolism.

For some years, I have been troubled with rheumatism that I could hardly walk, and suffered great pain. I had medical treatment but did not get any relief. The pain was in my back and legs. I was told that the blood was impure. I was told that the blood was impure. I was told that the blood was impure. I was told that the blood was impure. I was told that the blood was impure.

You can get these pills from your druggist. They are sold in 50 cent boxes. You can get these pills from your druggist. They are sold in 50 cent boxes. You can get these pills from your druggist. They are sold in 50 cent boxes.

Humbly in Politics

Philosophical Remarks Accredited To the Late "Ray" O'Connor

Looking back over a long and active career "Ray" O'Connor in his last years, made his observation from the wheel chair in his London apartment. When a man gets to be as old as I am he realizes that there is a lot of humbug in politics. That often whole situations would have been enough to go to go around. The philosopher who reaches that stage of life when he has nothing to fear finds politics an unchanged art, its practitioners make the same in every country and it is comically amusing except when it is freighted with tragedy for the innocent. — New York Sun.

Wise mothers who know the virtues of Mother Gray's Worm Expeller always have it at hand, because it gives its value.

Speculation vs. Investment

Getting Something for Nothing Is Different To Making Dollars Earn

Every one has begun more or less interested in the stock market, and financially, in the recent mad frenzy of speculation, and the slump which has taken place on the various stock exchanges of the world. No end of moral lessons have been preached about it, but we were much struck by a concluding sentence in an editorial in the *Oregon Palladium*, of Times concerning it, which said: "To try to get something for nothing is speculation. To try to have honest dollars earn a fair return is investment. If money was given in the past half-century and been sent chasing rainbows had been just as sound Oregon industrial enterprise, all hands and the community to try would be as more prosperous and far more content."

It needs only to be added that the money truth applied with equal force to many Canadian cities. Since the beginning of our era.

CONSTIPATION

RELIEVED QUICKLY

Dr. Williams' Pink Pills will move the bowels without any pain, and will be found to be a most effective remedy for all cases of constipation. It is a most effective remedy for all cases of constipation. It is a most effective remedy for all cases of constipation. It is a most effective remedy for all cases of constipation.

Women Are Making Progress As Aviators

Have Yet To Be Proved Man's Equal As Pilots

The Toronto Telegram in its weekly feature "With the Flyers" takes up the question of women. It was long ago agreed that women make good flyers, that they like the clean thrill of flying and their nerve is about as steady as a man's, but whether they will prove equal to men as pilots remains to be seen. They might, for once-upon-a-time, men scoffed at the thought of women driving a car. Most men still think that women are weak as motorists. But there are lots of poor drivers amongst men and lots of expert ones amongst women.

About the only place women seem to be failing to make headway, as a motorist, is in the big cities. They are not obtaining the training necessary to visit with men on the established runs of the big touring companies. Perhaps the males, if they are apprehensive of the march of women-wings, are not taking comfort out of the fact that it is not likely that women will ever fly as pilots of large passenger and freight carriers.

At an airport near London a steadily increasing patronage among women the world over. Aircraft drivers are using women to promote air-mindedness amongst others of their sex.

The only place in aviation which women can't enter, for one reason or another, is in the big cities. They are not obtaining the training necessary to visit with men on the established runs of the big touring companies. Perhaps the males, if they are apprehensive of the march of women-wings, are not taking comfort out of the fact that it is not likely that women will ever fly as pilots of large passenger and freight carriers.

At an airport near London a steadily increasing patronage among women the world over. Aircraft drivers are using women to promote air-mindedness amongst others of their sex.

The only place in aviation which women can't enter, for one reason or another, is in the big cities. They are not obtaining the training necessary to visit with men on the established runs of the big touring companies. Perhaps the males, if they are apprehensive of the march of women-wings, are not taking comfort out of the fact that it is not likely that women will ever fly as pilots of large passenger and freight carriers.

Radio Roads Across Sea

New Developments Would Assist Science and Art Of Navigation

Remarkable claims are made on behalf of the new radio development perfected by M. Lott, and just announced to the French Academy of Sciences. His proposal, by means of radio towers on the European and American Atlantic coasts, and electric waves transmitted across the sea, to guide ships and planes surely and safely between the two distant continents. In this way he hopes to supersede the necessity of charts and compasses, navigators and pilots. Their place will be taken, by radio operators and interpreters, who will send the guiding beams from shore to shore and interpret them when they are received. The appointed routes will be changed as circumstances require, and in accordance with traffic and weather conditions as they are gauged by a skilled pilot on land.

These proposals have created a sensation in Europe where aeronautics has already been made that the first four radio towers will be erected within two years. Similar devices have already been tried on a small scale and proved effective for the direction of aircraft. Radio roads across the sea would be a most practical and a probability. They would upend the science and art of navigation, first developed by the Phoenician traders thousands of years ago and not more than a century ago. They would be a most practical and a probability. SCOTT'S EMULSION. TRY IT THE EASY PLEASANT WAY.

Invents Weather Control

French Engineer Claims His Device Will Avoid Storms

M. William Lott, a French engineer, has perfected a radio control, which he claims will make it possible for an inexperienced aviator to pilot his plane from Paris to New York without fear of running into bad weather. Similarly, ships could be navigated by sailors with no knowledge of navigation, sextants or weather maps.

Radio light beams form the secret of Lott's weather control, which has been shown to the French Academy of Science. Through two stations transmitting his weather radio waves, which are aimed in principle to the horizon waves, Lott says he can direct a ship or an aeroplane so that all bad weather can be avoided.

Wide Use Of Combines. In 1928, states the Department of Agriculture, the use of combines in Western Canada to harvest wheat, oats, barley, spring rye, fall rye, flax, and other crops, has increased from 1927 to 1928, and the use of combines in the Prairie Provinces to 1928 showed a large increase over 1927.

The water is so clear in the fords of Norway that objects as small as a half a dollar can be seen distinctly at a depth of 350 feet.

He Asked Them Does It Pay To Clip Cows?

A CERTAIN farmer wanted to know if it was worth the trouble to clip his cows. He asked them, "Does it pay to clip cows?"

Before we clipped our cows we had a high birth rate and a low milk yield. After we clipped them we had a low birth rate and a high milk yield. It is worth the trouble to clip cows.

Before we clipped our cows we had a high birth rate and a low milk yield. After we clipped them we had a low birth rate and a high milk yield. It is worth the trouble to clip cows.

WORLD HAPPENINGS
BRIEFLY TOLD

Quarterly returns indicated that Great Britain's exports would exceed \$600 million this year compared with \$400,000 in 1920.

The U.S. National Geographic Society has announced it has granted an additional \$35,000 to Commander Richard E. Byrd for his Antarctic expedition. The society has already granted \$25,000.

An international conference looking toward the regulation of operation of traffic in the fishing industry of the Canadian coast may be called at Ottawa next year, the Department of Commerce, at Washington, is informed.

Allotment of millions of dollars for construction of new cruises and submarines will be considered by the U.S. Navy Appropriations Committee in January, regardless of the naval limitation conference, beginning in London, England, that month.

Former Governor Alfred E. Smith, of New York, has revealed that the new Empire State building which his company is to erect on the site of the old Waldorf-Astoria hotel, will tower 85 stories into the air, and is higher than any other structure in the world.

Brazil has agreed to accept a large percentage of the German-Russian refugees, some of whom are already in Germany, while others are awaiting opportunity to leave Russia. The peasants will be given land in the Serra Brasilia, where there are a number of German settlements.

Among the candidates whose names have been submitted to the committee which will award the Nobel Peace prize is that of Frank E. Kellogg, former United States secretary of state and co-worker with Foreign Minister Briand in bringing about the famous Kellogg-Briand renunciation of war pact.

The council of the Chinese government has addressed an appeal both to the League of Nations and to individual signatories of the Kellogg-Briand peace pact to take steps to halt and punish the Russian Soviet "invasion" of Chinese territory. The invasion was termed a deliberate violation of the antiwar pact.

Build Cottages for Britishers
Canadian National Railways Has Plan To Help New Settlers

The problem of housing British immigrant families come to Canada to settle on the land is being met, to some extent at least, by the offer of the Canadian National Railways to build cottages for the Britishers at various points on the prairies so that the new arrivals may secure a home at a nominal rent of three dollars a month. This offer has been approved by the Overseas Settlement Board of the British Government.

British people, forming the bulk of the immigrant tide into Canada, often suffer because they are unprepared to cope with the conditions in the farming districts of the Dominion, which are so different from those prevailing in the Old Country. On the other hand, immigrants from Europe, especially the northern parts of Europe, are accustomed, even before they embark for the voyage overseas, to the solitude and rigours of a life where settlement has left much of the countryside unoccupied.

The cottages to be built by the Canadian National in the three prairie provinces will stand on a fenced plot of land averaging from one half to one acre in extent. They will be served by good roads and as near as possible to the local market place and school. They will be furnished with stoves and simple furniture.

It is understood that the families will occupy the cottages only during their first year in Canada, while they are obtaining practical experience in farming conditions.

There is a good deal in what a great philosopher has said. "The most utility lost of all days is that in which you have not laughed."

"Why are you in the street, in pajamas?"
"Professor," said a minute and in me guess—"Lustige Sache, Leipzig."

W. N. U. 1824

Awaiting Deportation

One Hundred Men From British Isles Are Stranded in Toronto

Upward of 100 men brought out to Canada from the British Isles during the summer to work on farms throughout the Dominion are waiting to be deported, the Toronto Telegram says. A good many of them are complaining that they are now without food and without lodging, and are wondering how they are going to live until they get work, or until the Ontario and Dominion governments decide to deport them.

These men were brought to Canada by the St. George Society of Ottawa, the British League of Montreal, the Ontario government and the Dominion government, and placed on farms where they were supposed to be paid \$20 a month minimum, and guaranteed continuous employment they state, the Telegram says.

They are without any official word from any government authority as to what is going to happen to them.

"The Dominion Government Inspector, C. O. Mitchell said that cases were being considered by him and the Ontario Government authorities.

The map above shows the district in which the MacAlpine exploration party spent two months of rest and privation before they were able to get in touch with civilization.

Over Ten Thousand Tourists Visited Prince Albert Park This Year

The success of Prince Albert National Park, the most recent addition to the system of recreational reserves administered by the National Parks of Canada Branch of the Department of the Interior, has been immediate. Although only established for a little more than two years it has already built up a reputation which is evidence that it will soon become one of the most popular of the Dominion's playgrounds. Until its establishment few people outside of the province itself had any conception of the rich recreational resources of Saskatchewan, a province whose name has been synonymous with vast expanses of golden grain and busy elevators. Last year, although the park had not been opened until August 10, and those who came had to bring with them camping equipment and supplies, over 5,000 people motored the seventy miles from the city of Prince Albert to the park. This year the total number of visitors exceeded 10,000 and it is interesting to note that registrations included cars from all the provinces of Canada and from practically every part of the United States, showing the reputation which this interesting section has already gained among nature lovers.

A site for a serapine landing has been laid out and already several transcontinental liners have landed in the park. In view of the rapid increase in the use of aeroplanes, it seems not unlikely that this may soon become one of the regular means of access to the park and that the reserve may also be a starting point for flights to regions in the far north.

Flora of Waterton Lakes Park
The prairie flora and the mountain flora meet in Waterton Lakes National Park in the southwest corner of the province of Alberta. Here, in the valleys, and on the lower eastern slopes of the Rocky Mountains, the wild flowers bloom in every hue. In July the higher passes are coloured with delicate blossoms of every hue.

Magnetic Survey Work
A magnetic survey party from the Dominion Observatory, Ottawa, just returned from the field, spent the summer making magnetic observations along the Albany River and in James Bay, returning via the Athabasca River.

LOG CABIN 100 YEARS OLD

This log house, over 100 years old, stands on the farm of George Currie, Esquimaux township, Ont., two miles north of Hornby. It was built by the present owner's grandfather, George Currie, after he came out from Scotland about 1810, and settled on a farm in the same township. The land was covered with pine trees which Mr. Currie cut down himself. Some of the hand-hewn logs were used in building the house. It has been vacant for a number of years.

Here, in the valleys, and on the lower eastern slopes of the Rocky Mountains, the wild flowers bloom in every hue. In July the higher passes are coloured with delicate blossoms of every hue.

Magnetic Survey Work
A magnetic survey party from the Dominion Observatory, Ottawa, just returned from the field, spent the summer making magnetic observations along the Albany River and in James Bay, returning via the Athabasca River.

LOG CABIN 100 YEARS OLD

This log house, over 100 years old, stands on the farm of George Currie, Esquimaux township, Ont., two miles north of Hornby. It was built by the present owner's grandfather, George Currie, after he came out from Scotland about 1810, and settled on a farm in the same township. The land was covered with pine trees which Mr. Currie cut down himself. Some of the hand-hewn logs were used in building the house. It has been vacant for a number of years.

Why are you in the street, in pajamas?"
"Professor," said a minute and in me guess—"Lustige Sache, Leipzig."

W. N. U. 1824

Japs Want To Grow Taller

Government Hopes To Increase Stature Of Next Generation

An interesting story comes from Japan, the land of little people. It is to the effect that by the increased use of milk and milk products as a result of a government campaign, it is hoped within next generation, to increase the average height of the Japanese people by one to two inches. The why and the wherefore of this interesting experiment was explained by one of the speakers at the National Dairy Conference, at Toronto, and it affords an interesting insight on the value of milk and milk products as articles of diet.

If the Japanese government hopes to increase the stature of its people by the simple expedient of encouraging them to drink more milk, surely it should be possible for the people of this country to improve their own physique by a similar method. Canadian, of course, use milk with a great deal more than is yet known in Japan, but there is yet room for improvement and it might be worth while to take a lesson from the Japanese and still further build up the stature of the Canadian people by this very simple process.

Turner Valley Oil
Oil Produced In Canada Only Small Percentage Of Annual Consumption

According to E. S. Barry, in charge of the Province of Alberta exhibit at the Produced in Canada Exhibition, Canada's imports of gasoline and oil products run to \$60,000,000 annually. "The present annual production in Canada," he pointed out, "is equal to only four days' consumption, but is steadily increasing." Turner Valley's contribution, during the first nine months of the present year was 567,042 barrels.

A Peculiar Plant

The plant coral-root has neither root nor leaves, being a cluster of underground stems and an upright branch which is a few inches high and bears a number of purplish flowers.

The London Chamber of Commerce now has more than 100 women members, most of whom, as heads of commercial houses, have an income of more than \$10,000 a year.

Chickens that come home to roost have more sense than some men.

Canada To Import
British West Indies Fruits

Fifteen Thousand Crates Of Oranges From Dominica To Come Next Year

"We expect to ship from ten to fifteen thousand crates of Dominica oranges into the Maritime and Montreal markets next year," declared Captain A. D. Robertson, of Dominica, B.W.I., who arrived at Saint John on the B.M.S. Lady Victoria, of the Canadian National Steamship, from the West Indies.

The Dominica oranges, which took up the cultivation of oranges and grapefruit at Dominica as a hobby after the war, stated that there were excellent possibilities for the cultivation of citrus fruit on the island of Dominica, and he said that at the Manchester Exhibition, the Dominica oranges and grapefruit captured first place over the California product. Eighty per cent. of his product consists of Washington hawthorn, and the remainder orange stock. A unique feature of the Dominica citrus fruit industry was that on his estate he discovered several trees of Valencia's, which had no seeds. He visualized great possibilities for the industry, which, in his opinion should result in Canadian obtaining their oranges and grapefruit at a lower price.

The lack of the development of the citrus fruit industry in Dominica, Captain Robertson stated, was due to the lack of adequate steamships to connect with him in his enterprise. Mr. E. K. Knowlton, who accompanied him on his trip. The climate of Dominica, Captain Robertson declared, was delightful, with an average temperature of 75 degrees. Captain Robertson was associated with the Gordon during the war, serving on the Bulgarian and Western Fronts.

Naturalists Find Large Worms

Specimens Discovered In Australia Six Feet Long

Earthworms longer than a man and an inch in diameter are reported in the British scientific magazine "Nature" as the quarry of a naturalist's hunt in southeastern Australia. Average specimens range from four to six feet in length, and one nine feet was observed by Charles Barrett, member of the expedition. An extreme length of eleven feet was reported though not seen on this expedition.

The worms make loud gurgling noises when they retire into their burrows on the approach of a possible enemy. Their gremialia, which have tough, horny shells, and are from two to three inches in length.

Applicant: "And if I take the job as to get a raise in salary every year?"
Employer: "Yes, provided, of course, that your work is satisfactory."

Applicant: "Ah, I thought there was a catch in it somewhere!"

WINDOLITE
The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal distributor and guardian of health as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective against the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have proved that WINDOLITE is the most effective substitute for glass, that it freely admits the Ultra-Violet rays, and the a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their dwellings.

Indeed, the discovery of WINDOLITE during the last six years completely revolutionized gardening, given an impetus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has great value in the raising of cattle and is now being used in domestic and household requirements.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Fewer Forest Fires
Loss in Canada Last Summer Was Comparatively Low

Loss of timber by forest fires in the past summer was comparatively low. Up to the end of September, British Columbia had 2,011 outbreaks, and of these half had been in the southern interior where the hazard for some time has been extreme. In the prairie provinces the area burned has been high, and it is feared that the losses will be found to be serious. In Ontario the amount of the commercial timber burned is reported as surprisingly low, that is, in the fire districts which have been within the limit of possible protection, not including northwest Ontario. In Quebec, the few fires are probably below normal. In the Maritimes, where the hazard has been higher than in many years, the losses again are comparatively low.

The Scientific Fisherman

Carries Thermometer When Going After Certain Kinds Of Fish

The fisherman of today writes "Look-on" in the London Daily Chronicle, is something of a scientist when compared with his prototype of a few decades ago, for he now carries a thermometer when going to fish. It has been proved that certain fish frequent waters of a particular temperature, hence if the nature of the water is known preparations can be made most suited to the kind of catch that is expected. Cod, for example, have a preference for water of 62 degrees, and from near the coast of Newfoundland and Labrador, where the water is of this temperature, enormous quantities of these fish have been caught.

Increase In Life Insurance

\$400 In Insurance For Every Man, Woman and Child in the Dominion

The total amount of life insurance carried by the people of Canada is \$400 million, or \$400,000,000 or approximately \$400 for every man, woman and child in the Dominion. The United States with \$750 per head of population is the only country in the world that exceeds Canada in the amount of life insurance carried.

The number of life insurance policies in force in Canada is 7,000,000 in round figures, or about three for every family in the Dominion. An encouraging fact about life insurance in Canada is that no one has ever lost a cent as a result of the failure of a Canadian life insurance company, which is principally due to the supervision of the Canadian Government Department of Insurance over the companies for the protection of policy holders.

Over \$300,000,000 is paid annually by the people to Canadian life insurance premiums. In the past 10 years the number of policies carried has doubled and the assets of the Canadian life insurance companies is placed at \$1,200,000,000.

A new and hitherto unknown route across the Rocky Mountains has been discovered through a pass into British Columbia over the western boundary of Jasper Park, Alberta.

Peasants are used in the manufacture of several varieties of wood stains.

The Broomfield Hotel

Nature Has Gas Plant

Remarkable Specimen Of "Burning Bush" Grows In London's New Gardens

When we speak of a "gas plant" we naturally think of coal ovens and gas meters. Nature however provides a gas plant, specimens of which are to be found growing in London's New Gardens. It is otherwise known as the "Burning Bush" or "Santalum". When a lighted match is applied to a shoot of it there comes a brilliant scarlet flame. Like a flash of lightning it draws up the length of the flowering shoot, without injuring it. The best time to make the experiment is when the flowers are fading. The inflammability of the plant is due to the fact that its stalks are minute red-brown glands, and these secrete an etheric oil. The glands develop fully soon after the blossom begins to fade, but they shivel up when the fruit begins to form. Luminous plants not unlike this have been a source of strange legends in India and Afghanistan. There is a mountain called Koll Afghanistan, where the natives believe that gold and silver exist. In springtime the slopes are covered with bushes that at night from a distance seem to be on fire, yet when you are close to them there is no sign of flame. The "burning bush" at Kew is a handsome plant about three feet high, with pink flowers and leaves much like those of the ash tree.

A Miniature Writer

German Living In United States Acquires Style For Writing. Hugo Reicher, a German living in the United States, has acquired a style of writing which few can imitate. He conceived the idea of writing letters while sending Christmas greetings to his customers. He made an effort to write in a cursive hand, and his first attempt netted 10,000 words and he increased that to double on the second attempt. He has written the Constitution of the United States, the Declaration of Independence, the text of the 18th Amendment, and the text of the Republican party, ex-President Coolidge's Memorial day addresses given at the National cemetery and Gettysburg, a translation of the address given at Kansas City, November 11, 1926, and many other important documents. He has written a letter at a distance the paper looks blurred. The book that contains the Gospel according to St. Matthew, from the genealogy of Jesus to the final interview and commission, has thirty-seven pages, each page two inches wide and one and one-half inches high, and has a total of 23,271 words. The original book contained thirty-four pages, seven inches wide and one and one-half inches high.

Canada's Development

British Paper Sets Canada As Center Of The Empire. Not so long ago a prominent statesman prophesied that before the end of the present century the British Empire would find its centre of gravity in Canada, and that this great island would be maintained as a population as large as that of the United States. There is nothing inherently improbable in either surmise, for while these little islands have apparently reached saturation point in the matter of population, Canada has vast spaces eminently fitted to become the homes of men and the centers of our race. Moreover, encouragement is to be derived from the fact that Canada has preserved a magnificent loyalty to the Motherland, and has, in addition, resolutely encouraged the free play of individual enterprise in her economic structure, with the result that the way is open to stimulate industrial and commercial development.

Minard's Liniment For Chapped Hands

"You got a big fine for smashing up someone's car? I thought you said you had a friend in court who would help you out. Well, I'm sorry. I ran into it."

Teacher—We Can't Take Things That Are Unlike from each Other—For Instance, you can't take three cakes from four chickens.

Parson's Son—But you can take three gallons of milk from four cows.

Film companies in the United States carry on their permanent payrolls more than 325,000 employees.

Soviets Pass Drastic Law

Ministry Refusing To Return To Country On Call Are Declared Outlaws

Harsh Soviet Dictators working or residing abroad who refuse to obey the summons of their government to return to Russia will be adjudged guilty of treason. When finally taken into custody they will be sent to prison and shot within 24 hours after their trial is established.

This drastic measure was taken by the central executive committee of the Soviet Union in the light of the recent refusal of M. Besodovsky, of the Soviet embassy at Paris, to return to Moscow to face trial on charges of embezzlement.

The new decree is retroactive and declares that all such Soviet citizens will be classed as outlaws and deserters, and as enemies of the workers and peasants. All their property will be confiscated and their cases tried by the supreme court of the union and their names broadcast as outlaws.

KEEP THEM HAPPY BY KEEPING THEM WELL

It is natural for children to be made of flesh and blood. When they are fretful, fussy and disinclined to play you may be sure something is wrong. Almost invariably that something lies in the digestive tract.

It is to meet the need for an absolute purity of children's aliment that Baby's Own Tablets have been designed. They gently remove the stomach and bowels, thus drive out constipation and indigestion, break down acids and simple fevers, and allow healthy babies to thrive.

When Mrs. W. E. Forth, Dover, N.B., writes: "I would not be without a box of Baby's Own Tablets as I know of nothing to equal them. My fretful, fussy babies who are troubled with colds or other ailments. Baby's Own Tablets are sold by mail order for 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont."

Made Successful Flight

Windmill Plane Remarkably Steady Even In Strong Wind

An airplane fitted with four windmill planes, which revolve, recently made a trial flight, and landed at Lympe, England. Although there was a fairly strong wind, it was remarkably steady in flight. The craft was piloted by M. Elton, of Paris. When flying over Lympe, it circled several times, and eventually came straight down from a height of several hundred feet, making a perfect landing.

Minard's Liniment For Coughs.

One unpleasant consequence of the swelled head is the cold shoulder. G. K. Chesterton is fond of telling this story again and again. He once sent his secretary to protest against the noise made by a factory near his house.

"Mr. Chesterton can't write," said the secretary.

"I know he can't," agreed the manager. "He's always sick."

A journey to Berlin from London by land and water takes twenty hours; by air it takes only nine and three-fourths.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callus comes away without injury to the flesh.

Defeated Boxer: "With a straight left I broke me nose, then a terrifying left hook fractured my jaw, and I remembered no more."

Disgraced Wife: "Well, ye didn't want any more to remember, did ye?"

After 379 years the Pope has reconstituted the See of Iceland which became decadent when Danish reformers in 1550 beheaded Bishop John Arason.

French Museum Gets

Cedar Grizzly Bear

Primitive Work Of B.C. Indians To First Place In Old World Collection

A grizzly bear carried out of a tree, a piece of primitive but magnificent Canadian art, is now on its way to Paris, to be studied and admired. The grizzly bear of Newfoundland, telling in its nine figures with wide staring eyes and grinning mouths, a strange and thrilling tale of life in the gift of the Canadian National Railways to the Trocadero Museum. It will be given a place of honor in the ethnological section of the museum, in the hall devoted to the Indians of North America. This hall is being reconstructed by Paul Cote, French painter and expert in Indian art and customs. Mr. Cote spent part of last summer at Kootenay and Hazelton, B.C., where he met of Canada's totem poles stand in their native setting.

T. R. Campbell, Canadian National Railway engineer, who has for several years been engaged in the work of restoring and preserving totem poles in British Columbia, and along the coast of British Columbia, procured the grizzly and arranged for its shipment to France. The pole stands twenty feet tall.

Growth Of Airplane

Express Service Rapid

Great Advance Made Since Starting Ten Years Ago. It was in August, 1919, that the world's first aeroplane express service was started by British companies between London and Paris. The pilot was Captain E. H. Lawrence, a famous pioneer aviator, and the machine was a biplane of 360 hp., carrying only two passengers. Today one of the London-Paris air liners of Imperial Airways, Ltd., is a monoplane of 1,000 hp., and carries 20 passengers, pilot, engineer, and steward. At the end of 1919 there were only about 3,000 miles of organized air lines throughout Europe. Today the figure stands at 50,000 miles, while throughout the world there are 90,000 miles.

Canadian Steamship Line To India

Minister Of Trade and Commerce Is Looking Into Question

With a view to considering the establishment of steamship service from eastern Canada ports to India, British Africa, the Minister of Trade and Commerce has authorized the issue of calls for tenders to ascertain the probable cost of such steamship services. The government, it is stated, does not obligate itself to accept the tender for any tender but the trade prospects from such service appear sufficiently encouraging to warrant a study being made of the situation in the interests of Canadian exporters generally.

Copies of the tenders have been mailed to the high commissioners in England and to shipping firms which may be interested in this proposal. The tenders will close on January 15, 1930.

The service will be required to commence in 1930. The steamers or motor ships utilized must be of British register.

Feed Cost For Eggs

Yearly Egg Production That Is Necessary To Pay For Keep. With eggs at forty cents per dozen, a hen must lay about seventy-five eggs in a year to pay for her feed. This is the conclusion reached as a result of an experiment carried on by the late Anne de la Potholier, Experimental Station, operated by the Department of Agriculture, at Ottawa. The trial was made in twenty hens that laid well during the winter months.

The flock was kept in a thoroughly modern manner with respect to housing and other matters, and given feed which cost \$2.53 per hen for the year.

Inventions of a domestic nature won the greatest interest at the recent Exhibition of Inventions in London. A hop and eye which is easily and quickly attached to material without sewing, patented by a woman, was shown. A device for preventing the contents of a saucepan from boiling over, and an apparatus for starting a fire down by pulling a cord in the bed room, also attracted much attention.

Claims Important Discovery

Dr. R. B. Himmenger, of the Vienna Physiological Institute claims he has succeeded in temporarily restoring blood circulation and reviving other functions in dead bodies. He said he used a motor-driven pump and simultaneously injected salt water into the veins. Full appearance of life was restored, but color returned to the cheeks and wounds bled.

The victim was remained virtually unchanged in shape or substance for 300 years.

Astrology Overcome

The triumph over astrology has been achieved, Dr. J. D. Kellogg's Astoria Remedy has even convinced the underlings of the victim of asthmatic attacks has even known. Letters received from thousands who have tried it form a testimonial which leaves no room for doubt that this is a real remedy. Get it today from your dealer.

Good-Night Nurse

Her husband had just come home and had his first meeting with the new nurse. He was remarkably pretty.

"She is sensible and scientific, too," said the nurse, "and she says she will allow no one to kiss the baby while she is near."

"No one would want to," replied the husband, "while she is near."

On COUGHS AND COLDS BUCKLEY'S

Joe Black, singing waiter at Black's, was never night clerk in London. Grace Farrell, the cigarette girl, had been down in London since Molly Winton, a ballad singer, and was famous as a composer of popular songs. When their baby daughter is two years old, they are going with John Perry, Al's best friend, back and Perry take the child Al and Grace and sell for France. Al completely broken by his loss, disappears from Broadway and no more is heard of him. One day the sight of Grace Farrell on the street aroused his memory. He returns to Black's Joe's at night, talking to Blackie in his office until Blackie is asked out by a patron.

The Singing Fool

By HUBERT DAIL Copyright, 1929, L. B. Warner, Pictures, Inc.

STORY BY AL BLOOM, singing waiter at Black's Joe's New York night club is loved by Grace Farrell, the cigarette girl, but he doesn't know she is married to Molly Winton, a ballad singer, and was famous as a composer of popular songs. When their baby daughter is two years old, they are going with John Perry, Al's best friend, back and Perry take the child Al and Grace and sell for France. Al completely broken by his loss, disappears from Broadway and no more is heard of him. One day the sight of Grace Farrell on the street aroused his memory. He returns to Black's Joe's at night, talking to Blackie in his office until Blackie is asked out by a patron.

CHAPTER XXIV Blackie crossed the main room briefly to shake hands with the departing patrons and urge them to come again. But as he talked his mind was working on a problem. Suddenly he reached the conclusion that Grace Farrell was the logical one to approach. Al, she might reach his hidden nature and revive his courage when no one else could.

Grace worked at a desk in an alcove on the other side of the main room. A screen concealed her view of the room and she had not seen Al and Blackie's crowd the floor. Now she had just completed her accounts for the day, but she was undecided, for she had eyes opened wide when Blackie stood before her. From his expression she realized that something important had happened.

"Quinn who's here?"

"What, Blackie? Not—no! Al?"

"The same. Just wandered in a few minutes ago—looks as if he'd been sleeping on the wharves for a week."

Grace's hand darted to his cheek and pressed hard against it. So, it had happened, the thing she had dreamed of and worked so hard to bring about. Al was found!

"Listen, girlie," Blackie leaned forward confidentially. "He's in my office. I've talked to him, tried to make him stage a come-back, but I can't make a dent. He just shakes his head. Now you try. Treat him right, I'll bet you can get him to work."

Grace rose. She was listening, concentrating, planning. Every life has at least one big moment—this was to be hers! The soul and future of a talented, lovable man was at stake! As she planned she prepared for the big moment in a feminine way—petting her hair into shape, rearranging a stray curl, examining her

Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work as I was so rundown and nervous. My friends told me of the Vegetable Compound. I am now robust and well and have gone back to work. I have a good appetite, my complexion is good and I am in good spirits."—Edith Brown, 139 Alma Street, Boston, New Brunswick.

Wheat Pool Notes

The past year has been one of marked progress for the Alberta Wheat Pool. The annual report shows an increase in membership during the year of 5,515. The total membership at October 31, 1929, was 40,915, with 4,025,205 acres under contract.

The cost of operating the Alberta Wheat Pool during the past year was a little over half a cent a bushel, or a total of \$340,048.50. The handlings of wheat totaled \$14,350,000.

The delegates assembled at the annual expressed themselves as opposed to a compulsory pool by an overwhelming vote. A resolution was passed making the objective of the voluntary pool 100 per cent of the grain growers of the province, and urging that every effort be made to attain that desired end.

The report of the Central Selling Agency showed the carryover from the 1928 crop year to be a little over 45 million bushels of wheat. The Canadian Pool handled 251,025,563 bushels of wheat during the 1928-29 crop year. Of this total 108,140,000 bushels were exported to fifteen countries.

George Melvor, sales manager of the Canadian Wheat Pool, in his report to the delegates stated that the pool's operations during the past year had undoubtedly prevented serious market slumps. That the wheat yield in the world for the 1929 crop was a record for all time; and British grain merchants were of the opinion that wheat should be selling on the basis of 50 cents in Winnipeg.

Director J. Jesse Burrant submitted a report recommending that the pool do not go into the flour milling business. A resolution was carried suggesting that the flour milling committee continue its investigations and that the matter be tabled until the pool had completed its elevator building program.

The feeling of the delegates' meeting was that in view of the short crop this year the pool should operate as economically as possible, but that the efficiency of the organization should not be impaired through false economy. The Alberta Wheat Pool operates at a less expense than the Department of Militia and Defence at Ottawa.

Objection was taken by some of the delegates to the pool publishing crop reports. Officials of the central organization stated that the publishing of these reports was not permanent policy.

All the board of directors of the Alberta Wheat Pool were re-elected and at a subsequent meeting they re-elected H. W. Wood as chairman for the ensuing year.

The delegates' meeting went on record as favoring continuation of the elevator building program in order to give as far as possible, elevator service to the bulk of the membership.

The elevator system during the past year showed excess earnings of \$55,473.58. The system handled over 50 million bushels of grain during the past year.

WHAT MADE THE EAGLE SCREAM
From the pen of William Shorrock
"The creature that once produced red blood and sturdy hearts will surely produce a Paul Revere, sounding the alarm and riding like hell over these Babylonian architects, who would take us from the sea and molding the young generation for the dance of death, a self-inflicted torture of driving nations into the cross of national crucifixion."

AND THE LION ROARED
Years ago another patriot was inspired to write the following:
"The British lion, whether it is roaming the deserts of India or climbing the forests of Canada, will not draw in its horns or retire into its shell."

KNOX PRESBYTERIAN CHURCH
